PYQ QUESTION BANK

Forensic Medicine & Toxicology

Year-wise compilation with answer keys

122 Questions | 8 Years | 2016 — 2024

Year	Questions
2016	51
2018	14
2019	10
2020	11
2021	10
2022	15
2023	9
2024	2
TOTAL	122

Questions sourced from NEET PG papers 2016–2024 (10 papers total). Answer keys verified against publisher solutions where available; some 2024 recall-based questions may have unverified keys.

2016 NEET PG • 51 Questions

Q1. Which of the following is not a culture bound syndrome?

- A. Amok
- B. Latah
- C. Dhat
- D. Von-Gogh

Answer: D (Von-Gogh)

Q2. Advantage of glycopyrolate over atropine is ?

- A. It is a natural alkaloid
- B. It lacks CNS penetration
- C. Can be used in OPC poisoning
- D. Is more potent

Answer: B (It lacks CNS penetration)

Q3. Oximes are ineffective in which of the following poisoning :?

- A. Organophosphate poisoning
- B. Amanita phylloides poisoning
- C. Carbamate poisoning
- D. Dhatura poisoning

Answer: C (Carbamate poisoning)

Q4. If a woman is assaulted by her husband then he is charged under?

- A. Sec. 498-A IPC
- B. Sec. 304-A IPC
- C. Sec. 304-B IPC
- D. Sec. 504 IPC

Answer: A (Sec. 498-A IPC)

Q5. Punishment for criminal abortion for the women who gives consent and the performer are covered under IPC section ?

- A. 312
- B. 313
- C. 314
- D. 315

Answer: A (312)

Q6. Adultery is described under which section of IPC?

- A. 314
- B. 375
- C. 497
- D. 504

Answer: C (497)

Q7. Use of dangerous weapon is related to which section of IPC?

- A. 304
- B. 319
- C. 322
- D. 324

Answer: D (324)

Q8. Grievous hurt comes under which section of IPC?

- A. Section 319
- B. Section 320
- C. Section 324
- D. Section 326

Answer: B (Section 320)

Q9. Section 89 IPC is for?

- A. Criminal responsibility of insane
- B. Criminal responsibility of a child
- C. Criminal responsibility of drunken person
- D. Age for consent

Answer: B (Criminal responsibility of a child)

- A. 7 years
- B. 10 years
- C. 14 years
- D. 21 years

Answer: A (7 years)

Q11. Adulteration of drug is under which section of IPC

- A. 271
- B. 272
- C. 273
- D. 274

Answer: D (274)

Q12. Minimum age for giving consent for organ donation in India is?

- A. 16 years
- B. 18 years
- C. 21 years
- D. No age limit

Answer: B (18 years)

Q13. Ossification centre of scaphoid appears at

- A. 1-6 months
- B. 1 to 2 years
- C. 2 to 4 years
- D. 4 to 6 years

Answer: D (4 to 6 years)

Q14. Subpubic angle is ?

- A. <65°
- B. 65-75°
- C. 85°
- D. 110-120°

Answer: C (85°)

Q15. First incisor to erupt is

- A. Lower central
- B. Upper central
- C. Lower lateral
- D. Upper lateral

Answer: A (Lower central)

Q16. A baby has stated to get his first milk teeth. His age is approximately?

- A. 3 months
- B. 6 months
- C. 9 months
- D. 12 months

Answer: B (6 months)

Q17. Rigor mortis occurs due to: September 2008

- A. Muscle of the body began to relax
- B. Capillo-venous distension in the most dependent body parts
- C. Muscle of the body began to stiffen
- D. Mummification of the body tissues

Answer: C (Muscle of the body began to stiffen)

Q18. Post mortem lividity is not seen in ?

- A. Drowning in well
- B. Drowning in a fast flowing river
- C. Postmortem submersion
- D. Drowning in chlorinated swimming pool

Answer: B (Drowning in a fast flowing river)

Q19. Post mortem staining gets fixed after ?

- A. 2-3 hrs.
- B. 3-4 hrs.
- C. 5-6 hrs..
- D. 7-8 hours

Answer: D (7-8 hours)

Q20. Suggilation is due to which of the following?

- A. Gravity leading to pooling of blood
- B. Escape of blood from microvasculature
- C. Molecular death leading to stiffening of muscles
- D. Autolysis of enzymes

Answer: A (Gravity leading to pooling of blood)

Q21. Earliest sign of fetal death -

- A. Spalding sign
- B. Robert's sign
- C. Ball sign
- D. Adipocere formation

Answer: B (Robert's sign)

Q22. First sign of maceration is

- A. Robert's sign
- B. Skin slippage
- C. Spalding sign
- D. Greenish discoloration of body

Answer: B (Skin slippage)

Q23. Which is the best temperature for putrefaction?

- A. - 10 degrees C
- B. 0 degrees C
- C. 30 degrees C
- D. 50 degrees C

Answer: C (30 degrees C)

Q24. According to Casper's dictum, decomposition is the fastest when the body is in which of the following?

- A. Air
- B. Water
- C. Earth
- D. Soil

Answer: A (Air)

Q25. Enzyme responsible for postmortem hemolysis is

- A. Hemolysin
- B. Lecithinase
- C. Lipoproteinase
- D. Protease

Answer: B (Lecithinase)

Q26. Mummification is enhanced by ?

- A. Moist and hot air
- B. Moist and cool air
- C. Dry and hot air
- D. Dry and cool air

Answer: C (Dry and hot air)

Q27. Postmortem wound best differs from the antemortem wound by ?

- A. Gaps on incising
- B. No clots
- C. Absence of erythema and cellular changes
- D. All

Answer: C (Absence of erythema and cellular changes)

Q28. Pugilistic attitude is characteristically seen in ?

- A. Burns
- B. Drowning
- C. Electrocution
- D. Hanging

Answer: A (Burns)

Q29. Which of the following causes maximum damage?

- A. Tandem
- B. Dumdum
- C. Souvenir
- D. Piggy

Answer: B (Dumdum)

Q30. A bullet packed with jacket and opens at a base is called

- A. Dum dum bullet
- B. Tandem bullet
- C. Duplex bullet
- D. Souvenir bullet

Answer: A (Dum dum bullet)

Q31. Heat Rupture is characterized by?

- A. Regular margins
- B. Irregular margins
- C. Ruptured blood vessels
- D. Ruptured Red Blood cells/clotted blood

Answer: B (Irregular margins)

Q32. Transvestism is ?

- A. Wearing clothes of opposite sex
- B. Touching ones own private parts to others
- C. Desire for sexual intercourse with dead bodies
- D. Orgasm from visualisation part of the body of a woman

Answer: A (Wearing clothes of opposite sex)

Q33. Which of the following is meant by the term 'Sin of Gomorrah'?

- A. Oral sex
- B. Anal sex
- C. Bestiality
- D. Lesbianism

Answer: A (Oral sex)

Q34. Voyeurism is ?

- A. Sexual gratification by watching the act of sexual intercourse
- B. Use of such objects for sexual gratification
- C. Sexual gratification is by self pain
- D. Sexual gratification by rubbing private part

Answer: A (Sexual gratification by watching the act of sexual intercourse)

Q35. Bansdola is a form of strangulation by: NEET

- A. Ligature
- B. Hands
- C. Wooden sticks
- D. Bend of elbow

Answer: C (Wooden sticks)

Q36. Following is most suggestive of antemortem hanging: DNB

- A. Salivary dribbling
- B. Congestion of lungs
- C. Ligature marks
- D. Petechial hemorrhages

Answer: A (Salivary dribbling)

Q37. True about strychnine poisoning is ?

- A. All muscles affected at the same time
- B. Shoulder girdle affected first
- C. Pelvic girdle affected first
- D. None of the above

Answer: A (All muscles affected at the same time)

Q38. Wrong about dhatura seeds is ?

- A. Kidney shaped
- B. Odourless
- C. Yellow brown
- D. Convex smooth surface

Answer: D (Convex smooth surface)

Q39. Highest content of cannabis is found in which part of the plant?

- A. Root
- B. Resin
- C. Seed
- D. Stem

Answer: B (Resin)

Q40. 'Cold Turkey' term is used to denote which of the following?

- A. Consumption of heroin
- B. Abrupt cessation of heroin
- C. Gradual withdrawal of heroin
- D. Place to withdraw a drug in a group

Answer: B (Abrupt cessation of heroin)

Q41. Smoky stool is seen in which poisoning?

- A. Phosphorus
- B. Arsenic
- C. Lead
- D. Zinc

Answer: A (Phosphorus)

Q42. Gigantin is active principle of

- A. Plumbago Rosea
- B. Calotropis
- C. Ricinus Communis
- D. P. Zeylanica

Answer: B (Calotropis)

Q43. Active ingredient of marking nut is ?

- A. Semecarpol
- B. Croton
- C. Abrin
- D. None

Answer: A (Semecarpol)

Q44. Not a contact poison: MAHE

- A. Pyrethrum
- B. Paris green
- C. Rotenone
- D. Eucalyptus oil

Answer: A (Pyrethrum)

Q45. Which of the following is not a indoor air pollutant?

- A. Carbon monoxide
- B. Nitrous oxide
- C. Radon
- D. Mercury

Answer: D (Mercury)

Q46. Flapping tremors are not seen in

- A. CO₂ toxicity
- B. Hypomagnesemia
- C. Subarachnoid hemorrhage
- D. Carbolic acid poisoning

Answer: D (Carbolic acid poisoning)

Q47. Fine tremors are found in which disorder

- A. Mercury poisoning
- B. Excess smoking
- C. Hypoglycemia
- D. All the above

Answer: D (All the above)

Q48. Indications of liver transplant in PCM poisoning are all except

- A. SGPT increase
- B. PT/INR
- C. High creatinine
- D. Encephalopathy

Answer: A (SGPT increase)

Q49. Percutaneous chemical lumbar sympathectomy is practised using -

- A. Phenol
- B. Ethanol
- C. Formalin
- D. Acetic acid

Answer: A (Phenol)

Q50. Risk factor for suicide is?

- A. Increased serotonin
- B. Drug abuse
- C. Female sex
- D. Married person

Answer: B (Drug abuse)

Q51. Suicide rate in India is?

- A. 10.5 /100,000
- B. 12.5/ 100,000
- C. 14.5/ 100,000
- D. 18/ 100,000

Answer: A (10.5 /100,000)

2018 NEET PG • 14 Questions

Q1. Copper sulfate, amytal capsule Blue 2. Ferrous sulfate Green 3. Sulphuric hydrochloric/acetic acid Black/charred 4. Nitric acid Yellow 5. Carbolic acid Buff/white 6. Arsenic White particles 7. Mercury Slate 8. Cresols Brown 80. Muscle pain, nephropathy caused by which metal poisoning

- A. Arsenic
- B. Cadmium
- C. Mercury
- D. Lead

Answer: A (Arsenic)

Q2. Posthumous child is?

- A. Child delivered after death of biological mother
- B. Child delivered after death of biological father
- C. Born after death of parents
- D. has been abandoned by parents

Answer: B (Child delivered after death of biological father)

Q3. M'naghten rule comes under which section of IPC?

- A. Crpc 84
- B. C pc 48
- C. Ipc 84
- D. IPC 48

Answer: C (Ipc 84)

Q4. Bluish discoloration of gastric mucosa seen in which poisoning?

- A. Mercury
- B. Cadmium
- C. Amytal sodium
- D. Arsenic

Answer: C (Amytal sodium)

Q5. Which is the first organ to putrefy ?

- A. Brian
- B. Heart
- C. Prostate
- D. Kidney

Answer: A (Brian)

Q6. Locard is famous for?

- A. Theory of exchange
- B. Fingerprint study
- C. Formula for estimation of stature
- D. System of personal identification using the body measurement

Answer: A (Theory of exchange)

Q7. What is the smell of mummified body?

- A. Odourless
- B. Putrid
- C. Pungent
- D. Offensive

Answer: A (Odourless)

Q8. Patient presented with proximal tubule proteinuria. Which metal is likely to be associated with it?

- A. Cadmium
- B. Mercury
- C. Gold
- D. Lead

Answer: A (Cadmium)

Q9. Which of the following constitutional article is not related to children?

- A. 23
- B. 21-A
- C. 42
- D. 24

Answer: C (42)

Q10. Which of the statement regarding Factory act is correct

- A. Child age less than 14 carrying serious work earn more money
- B. Less than 14 yr not done for factory act
- C. More than 72 hour work per week
- D. More than 82 hours a week

Answer: B (Less than 14 yr not done for factory act)

Q11. You are posted as an intern in causality. Which among the following patients with fracture will be your 1st priority to call ortho PG and inform?

- A. Patient's finger is blackening
- B. Patient can't extend his arm
- C. A 10 cm abrasion
- D. Intra articular fracture of Elbow Joint

Answer: A (Patient's finger is blackening)

Q12. Which metal results in "Saturnine gout" formation?

- A. Cadmium
- B. Lead
- C. Beryllium
- D. Mercury

Answer: B (Lead)

Q13. Maastricht classification of donation after cardiac death.What category is stage 3 ?

- A. Awaiting cardiac arrest
- B. Brought in dead
- C. Unsuccessful resuscitation
- D. Cardiac arrest after brain-stem death

Answer: A (Awaiting cardiac arrest)

Q14. Term pathology refers to?

- A. Work
- B. Function
- C. Details
- D. Explains

Answer: A (Work)

2019 NEET PG • 10 Questions

Q1. Sexual perversions(Exhibitionism) is under section

- A. Section 290
- B. Section 294
- C. Section 230
- D. Section 291

Answer: B (Section 294)

Q2. 1st affected in rigor mortis

- A. Eyelids
- B. Myocardium
- C. Jaw
- D. Neck

Answer: B (Myocardium)

Q3. Punishment for perjury is under which section IPC ?

- A. Sec 193
- B. Sec 191
- C. Sec 197
- D. Sec 190

Answer: A (Sec 193)

Q4. Viscera in toxicology stored in

- A. Glycerine
- B. Rectified spirit
- C. Formalism
- D. Saturated salt solution

Answer: D (Saturated salt solution)

Q5. Two identical twins will not have same

- A. Fingerprints
- B. DNA copies
- C. Iris color
- D. Blood group

Answer: A (Fingerprints)

Q6. In Alleged history of gun shot injury.there is burning, blackening, tattoooing around the wound Dirt collar, the injury is

- A. Close shot entry wound
- B. Close shot exit wound
- C. Distant shot entry wound
- D. distant shot exit wound

Answer: A (Close shot entry wound)

Q7. A child is having Battered baby syndrome how will you identify

- A. Stab wound
- B. Gunshot wound
- C. Bruise of different ages
- D. None of these

Answer: C (Bruise of different ages)

Q8. Risk of genetic diseases in consanguineous marriage between first cousins?

- A. 1-2%
- B. 4-8%
- C. 8-10%
- D. 12-14%

Answer: B (4-8%)

Q9. Test based on the principle of suspect's reaction, if he witnesses an event then he behaves in a certain way is?

- A. Narcoanalysis
- B. Brain mapping
- C. Truth serum testing
- D. Polygraph

Answer: D (Polygraph)

Q10. What is the cause of death according to the below death certificate

- A. Breast Cancer
- B. Secondaries
- C. Cerebral Hemorrhage
- D. All of the Above

Answer: D (All of the Above)

2020 NEET PG • 11 Questions

Q1. A 23-year-old male presented with a history of fatigue and tiredness. On investigation, he was found to have Hb values of 9gm%, MCV of 101 FL. peripheral smear examination showed microcytic RBC and hypersegmented neutrophils. Which is most probable etiology

- A. Lead poisoning
- B. Iron deficiency anemia
- C. Chronic alcoholism
- D. Hemolytic anemia

Answer: A (Lead poisoning)

Q2. Punishment of perjury comes under IPC section?

- A. IPC 191
- B. IPC 192
- C. IPC 193
- D. IPC 197

Answer: C (IPC 193)

Q3. Relatives of a patient told during postmortem examination that the person had a tattoo - which was now invisible. How to identify?

- A. Examine the Lymph node
- B. Spectrophotometer
- C. Ordinary light
- D. X-ray

Answer: A (Examine the Lymph node)

Q4. True about hymen in Child rape is-

- A. Hymen easily tears because it is thin
- B. Hymen easily tears because it is in the front
- C. Hymen hardly tears because it is highly elastic
- D. Hymen hardly tears because it is situated deep

Answer: D (Hymen hardly tears because it is situated deep)

Q5. Magnan's symptoms are related to

- A. Cocaine poisoning
- B. Cannabis
- C. Cannabis
- D. Alcohol

Answer: A (Cocaine poisoning)

Q6. Maximum work hours for a person including overtime under the factories act?

- A. 48
- B. 50
- C. 60
- D. 100

Answer: C (60)

Q7. The best method for routine monitoring of air pollution

- A. Sulphur dioxide, smoke, and particulate matter
- B. Sulphur dioxide, Hydrogen sulphide, carbon monoxide
- C. Carbon dioxide, hydrogen sulphide, lead
- D. Sulphur dioxide, Lead and particulate matter

Answer: D (Sulphur dioxide, Lead and particulate matter)

Q8. What poison will you detect in skeleton even after emaciation

- A. Lead
- B. Arsenic
- C. Mercury
- D. Cadmium

Answer: B (Arsenic)

Q9. The most common cause of death in SLE in children

- A. Lupus nephritis
- B. Lupus cerebritis
- C. Libman sacks endocarditis
- D. Anemia and infections

Answer: A (Lupus nephritis)

Q10. A man under alcohol intoxication had fallen into a manhole and had a perineal injury with swollen scrotum and upper thigh along with blood at meatus. The patient is having difficulty passing urine as well. What will be the injury associated due to this trauma?

- A. Bladder rupture
- B. Penile fracture
- C. Bulbar urethra
- D. Membranous urethra

Answer: C (Bulbar urethra)

Q11. Identify the phenomena

- A. Electric Burn
- B. Crocodile Burn
- C. Scalds
- D. Putrefaction

Answer: D (Putrefaction)

2021 NEET PG • 10 Questions

Q1. A child accidentally ingested some fruit which he plucked from a tree while playing . After the ingestion of the fruit , he presented with restlessness, painful swallowing, photophobia, dry skin , urinary retention and elevated body temperature. What is the possible poisoning and the appropriate antidote for it?

- A. Datura & Physostigmine
- B. Yellow oleander & Physostigmine
- C. Datura & Pralidoxime
- D. Yellow oleander & Pralidoxime

Answer: —

Q2. A 30 year old male presents with a history of consumption of some unknown substance. The attending doctor notices the person to be having diaphoresis, headache and acute coronary spasm like features. The person is least likely to show which clinical feature?

- A. Bradycardia
- B. Tachycardia
- C. Hyperthermia
- D. Hypertension

Answer: —

Q3. A doctor at autopsy noticed the following finding on a cadaver. Which of the following is true regarding this finding?

- A. It is due to sulphaemoglobin pigment
- B. This change is seen at 24 hours
- C. It is non bacterial
- D. It is associated with lightning case

Answer: —

Q4. Identify the injury

- A. Incised looking laceration
- B. Laceration
- C. Laceration looking incision
- D. Incision

Answer: —

Q5. While recording evidence in the court of law, lawyer asked the witness, “Were you present when A killed B?”, and the witness answered “yes”. This type of questioning is permitted in?

- A. Examination in chief
- B. Direct examination
- C. Redirect examination
- D. Cross examination

Answer: —

Q6. A dead body was recovered from near a pond by the police. During autopsy, the following finding was observed. The below phenomenon is due to

- A. Case of torture in hot water
- B. Case of postmortem hanging
- C. Case of immersion in water for 36 hours
- D. Case of colliquative liquefaction

Answer: —

Q7. A woman gave birth to twins. However, her husband asked for a DNA fingerprinting test as he believed that the babies did not belong to him. The results showed that one baby did not belong to him. This is a case of?

- A. Superfecundation
- B. Superfetation
- C. Atavism
- D. Posthumus child

Answer: —

Q8. A man was sitting in the balcony which was overlooking a park. He was sitting naked for sexual gratification. This is called

- A. Voyeurism
- B. Masochism
- C. Exhibitionism
- D. Fetishism

Answer: —

Q9. A daily wage labourer was working in the farm on a hot summer day and suddenly collapsed. He was brought to the hospital and the attending doctor measured his body temperature as 106 degrees fahrenheit. Which of the following symptoms is least likely to be seen?

- A. Sweating
- B. Hot skin
- C. Hypotension
- D. Disorientation

Answer: —

Q10. Identify the active principle in the poisonous seed shown below

- A. Abrin
- B. Ricin
- C. Cannabinol
- D. Bhilawanol

Answer: —

2022 NEET PG • 15 Questions

Q1. A 56-year-old man presents with fatigue, pallor, and abdominal pain. He reports memory loss and reveals that he works at a battery recycling plant. On examination, a noticeable foot drop in both lower extremities is seen. Laboratory testing shows elevated blood lead levels. Which enzyme is affected in the given scenario?

- A. Aminolevulinic acid (ALA) dehydratase
- B. Uroporphyrinogen III
- C. Uroporphyrinogen I
- D. Pyruvate dehydrogenase

Answer: A (Aminolevulinic acid (ALA) dehydratase)

Q2. A patient came with complaints of hair loss. His wife mentions that she has noticed some behavioral changes. The doctor notices a loss of eyebrows on the lateral side. He then concludes by examining the nails. What is the type of poisoning in this case?

- A. Thallium
- B. Arsenic
- C. Mercury
- D. Lead

Answer: A (Thallium)

Q3. A patient came with complaints of hair loss. His wife mentions that she has noticed some behavioral changes. The doctor notices a loss of eyebrows on the lateral side. He then concludes by examining the nails. What is the type of poisoning in this case?

- A. Thallium
- B. Arsenic
- C. Mercury
- D. Lead

Answer: —

Q4. Identify the gun that caused the wound and the range of the shot.

- A. Shotgun, intermediate range
- B. Shotgun, close range
- C. Pistol, near shot
- D. Pistol, close shot

Answer: C (Pistol, near shot)

Q5. Identify the type of wound from the image.

- A. Defense wounds
- B. Antemortem wound
- C. Postmortem wound
- D. Hesitation cuts

Answer: A (Defense wounds)

Q6. Identify the type of wound from the image.

- A. Defense wounds
- B. Antemortem wound
- C. Postmortem wound 34
- D. Hesitation cuts

Answer: —

Q7. A 45-year-old female patient is told about the benefits and complications of a hysterectomy, and she agrees to the procedure. What kind of consent is this?

- A. Informed consent
- B. Implied consent
- C. Opt-out
- D. Passive consent

Answer: A (Informed consent)

Q8. A 45-year-old female patient is told about the benefits and complications of a hysterectomy, and she agrees to the procedure. What kind of consent is this?

- A. Informed consent
- B. Implied consent
- C. Opt-out
- D. Passive consent

Answer: —

Q9. A 56-year-old man was diagnosed with COVID-19 and was put on mechanical ventilation. He passed away after a week. What is the likely post-mortem change seen in the lungs?

- A. Thick layer of fibrin lining the alveoli
- B. Acute and chronic alveolar hemorrhage
- C. Perivascular cuffing
- D. Pulmonary artery hypertrophy with increased resistance

Answer: —

Q10. A dead body is brought for evaluation. On post-mortem examination, a ligature completely encircled the neck, horizontal, and below the thyroid level was seen. There was no dribbling of saliva. What is the cause of death?

- A. Throttling
- B. Ligature strangulation
- C. Gagging
- D. Hanging

Answer: B (Ligature strangulation)

Q11. A dead body is brought for evaluation. On post-mortem examination, a ligature completely encircled the neck, horizontal, and below the thyroid level was seen. There was no dribbling of saliva. What is the cause of death?

- A. Throttling
- B. Ligature strangulation
- C. Gagging
- D. Hanging

Answer: —

Q12. A surgeon returns home from a party after many pegs of alcohol and is called to perform an emergency operation. During the operation, the assisting staff noticed the surgeon's handshaking and the instruments falling. He eventually nicks an artery, and the patient collapses. Under which of the following terms will this incident be tried?

- A. Criminal negligence
- B. Civil negligence not amounting to criminal negligence
- C. Therapeutic misadventure
- D. Dichotomy

Answer: A (Criminal negligence)

Q13. A surgeon returns home from a party after many pegs of alcohol and is called to 35 perform an emergency operation. During the operation, the assisting staff noticed the surgeon's handshaking and the instruments falling. He eventually nicks an artery, and the patient collapses. Under which of the following terms will this incident be tried?

- A. Criminal negligence
- B. Civil negligence not amounting to criminal negligence
- C. Therapeutic misadventure
- D. Dichotomy

Answer: —

Q14. During the court proceedings, the defense lawyer asks a leading question, which the prosecutor appeals against. The judge grants the appeal. Leading questions are not allowed in all of the following except?

- A. Re-examination
- B. Cross-examination
- C. Examination in chief
